Integrated Card and Biometric Solutions

Cashless Catering | Attendance | Access Control | Print & Copy

Fully integrated card and biometric solutions bringing new levels of efficiency and control to education

Schools and Colleges across the UK are enjoying the wealth of features and capabilities in Live Register's solutions; they have discovered many benefits from the use of card and biometric technologies. Live Register Suite brings our range of solutions together to offer even greater convenience to the student and new and exciting levels of efficiency and control to the school.

> We started using Cashless Catering nearly 5 years ago and have found it very simple, cost effective and convenient to use. More recently we added a late attendance solution and biometric access control into some of our buildings. The system has met our specific objectives and using one supplier was a real bonus. The equipment has performed well and friendly high level support has always been on hand when we've needed it.

Mr Tim Plumb

Woolwich Polytechnic School

Starting out

Our experience in education ensures each individual solution helps in solving key management issues; whether it's Free School Meals, reducing truancy or improving student safety, we can help.

Moving Up

Central control and monitoring becomes more effective as the system extends to different areas resulting in significant improvements to operational efficiency and audit accountability.

Supporting you

Modules can be added when you want. Whichever you start with, you'll be buying the best, safe in the knowledge that adding your next card or biometric system will be cheaper and simpler to install.

> It's about...choosing the best system for today, knowing that it can grow with your future needs.

SIMS

Commercial Partner

A choice of solutions for education

Staff and Student Information is automatically updated from your MIS

Central Control and Monitoring

Reports are easily generated for tracking individual or group usage and activity.

Card

Mifare Cards are fast, simple to use and can also be used as an ID badge.

Biometric

90% of Live Register systems deployed are biometric. The system has been refined over ten years and millions of user interactions – the speed and accuracy of detection is exceptional.

You Choose

Card or Biometric, the choice of technology is yours.

Live Register works equally well with both and the cost is the same too.

Whichever you choose, we have the solution.

We work in **partnership** with ESS SIMS, to find out more about our partnership with them and to see how our product integrates with SIMS contact us below:
